

Setting objectives pre-qualifying students for professional behaviour issues: A guide for practice assessors

These are some suggested objectives/goals for **professional behaviour issues** (please feel free to adapt amend for individual student issues). These can be used to set objectives with students when they have already been given **specific verbal feedback** regarding an area of concern regarding competency or professional behaviour. This should be documented in the students practice assessment document (PAD). Do involve your Link Lecturer in all discussions regarding unprofessional behaviour.

You should also see the guide for giving specific feedback in the students Practice Assessment Document (PAD)
